COURSE HANDOUT (I SEMESTER 2026 – 2027)

29.07.2026

COURSE NO : MPBA 523
COURSE TITLE : IT PROJECT MANAGEMENT

Course Description

Understanding project management, organizing and staffing the project office team, planning, project evaluation, cost control and trade off analysis in a project environment.

Scope and Objective

Essentials of Project Management are an introductory course on issues related to the project management of enterprises with emphasis on planning, scheduling and controlling. Students will be exposed to fundamental theories in business practice, and limitations and difficulties of project management theories in solving real problems. The basic objective of this course is to help students develop the skill found in competent project manager.

1	To get a feel of project management environment Understanding different forms of project management	What is project, Importance of project management PM in industrial setting and service setting, Strategy in project management, system approach to PM	T1, Chapter-1 and 2
2	Understanding organization structures for projects	Project management structures, comparing different structures and selecting right one.	T2 chapter no 3
3	Apprising new projects- Marketing analysis	Estimating market potential, qualitative and quantitative techniques	T1 Chapter 2
4	Technical analysis of projects	Technology selection, plant layout, technical feasibility reports	T1 Chapter no. 5
5	Financial analysis of projects	Estimating cost of projects, Projecting final accounts	T1 Chapter no. 6
6-7	Understanding project selection techniques	Project cash flow estimation, Quantitative techniques i.e. Pay back, NPV, IRR	T1 Chapter no. 8
	Case Study on project selection		
9	Defining project scope	What is project scope, Understanding work break down structures, Responsibility matrix, preparing communication plan	T1 chapter no 4
10	Estimating project times and costs	Identifying factors responsible for time estimates, Different methods for time and cost estimation	T1 chapter no 5
11-12	Developing a project plan	Developing project networks from work packages, AOA and AON Networks, Network computation process, practical consideration	T1 chapter no 6
13	Managing risks	Understand risk management process, contingency planning, change control Management	T1 chapter no 17
14	Scheduling resources and costs	Resource scheduling problems, classification of scheduling problems, multi project recourse schedules	T1 chapter no 8
	Crashing of projects	Direct, Indirect cost tradeoff, Crashing techniques	T1 chapter no 9
15	Project performance management and evaluation	The project control process, earned value concept, developing a status Report	T1 chapter no 11
16	Project Audit and closure	Project audits, Project closure	T1 chapter no 13

BIRLA INSTITUTE OF TECHNOLOGY AND SCIENCE, Pilani
Pilani Campus
AUGS/ AGSR Division

17	Agile Project Management Methodology	Steps in agile, Scrum, tools for agile	Class Notes
18	Agile tracking and reporting	Tracking and reporting in software Projects	Class Notes

BIRLA INSTITUTE OF TECHNOLOGY AND SCIENCE, Pilani
Pilani Campus
AUGS/ AGSR Division

Evaluation Scheme:

S. No.	Evaluation Component	Weighatge	Dates
1	Mid Term Exam	25	
2	Case studies	15	
3	Project	15	
4	Comprehensive Exam	35	1
5	Class participation	10	

Chamber Consultation hour MWF 5-6 PM 6068-D
