

SECOND SEMESTER 2026-2027
Course handout (Part-II)

Date: 30/07/2026

In addition to part-I (General Handout for all courses appended to the timetable) this portion gives further specific details regarding the course.

Course No. : MPBA G534
Course Title : People Analytics
Instructor-in-charge : MOHAMMAD FARAZ NAIM

1. Course description:

There will be three weekly classes. Class time will be devoted to lectures, role-plays, exercises, questionnaire, case discussions and videotapes. Lectures will provide analytical concepts that will integrate the readings and serve as useful framework for a richer understanding of cases and role-plays. Role-plays, cases and videotapes provide the "application" aspects of this course. These participative activities are further enhanced by rigorous self-review (through Journal, Follow-up Report and Critique). Tests and Project will provide an opportunity to test comprehension of the theory and readings.

2. Scope and Objective of the Course:

People Analytics is the application of data science and information technology in the domain of Human resource management. The present course is designed to progress the understanding of the role of data-driven decisions about people's issues in an organization. This emerging discipline signifies the strategic role of HR function in the contemporary organizations. However, with the advent of analytics, it has evolved into a holistic function taking care of all people related aspects at the workplace, not only traditional HR operations. It serves as a key driver in pursuit of sustainable competitive advantage for organizations by leveraging data driven practices for an improved decision making. Grounded on 4Ts principle: Task, Theory, Technique, and Technology; the course integrates underlying theories and principles, and data analytical tools and techniques to drive business objectives. The course is structured to equip students with hands-on experience on analytical softwares to track, maintain, retrieve, analyze, and interpret HR data (e.g., staffing, skills, performance ratings and compensation information) to contribute to business outcomes. This will serve the twin purpose of elevating the students' understanding on nuances of analytics in organizations, which will aid in students' value addition and employability.

The learning objectives of the course are as under:

- *This course introduces the student to the theory, concepts, and business application of human resources research, data, metrics, systems, analyses, and reporting.*

- The student will develop an understanding of the role and importance of HR analytics, and the ability to track, store, retrieve, analyze and interpret HR data to support decision making.
- The student will know about the standard HR metrics to measure various facets of HR related outputs and about indices and metrics to measure them.
- Employ appropriate software to record, maintain, retrieve and analyze human resources information (e.g., staffing, skills, performance ratings and compensation information).
- Apply quantitative and qualitative analysis to understand trends and indicators in human resource data; understand and apply various statistical analysis methods.
- Apply descriptive and predictive analytics techniques to address HR related issues and make data driven decision making.
- Demonstrate how to connect HR results to business results.

3. Text Book:

T1. HR Analytics: Understanding Theories and Applications (2017), by Dipak Kumar Bhattacharyya, Sage Publications, 2017.

T2. Making Human Capital Analytics Work: Measuring the ROI of Human Capital Processes and Outcomes, by Jack Philips and Patricia Philips, McGraw-Hill Education, 2019.

Reference Books:

R1. The HR Scorecard: Linking People, Strategy, and Performance, by Brian E. Becker, Mark A. Huselid, Mark A Huselid, David Ulrich, 2001.

R2. Predictive Analytics for Human Resources by Fitz-enz Jac and Mattox II John, Wiley, 2nd Edition, 2014.

5. Course Plan:

S. No.	Title of the Chapter	Learning Objectives	Reference in Book	LS*
1	Getting started with People Analytics	Introducing HR Analytics: introduction to Human resource management, human capital management, changing role of HR in modern organizations, defining HR Analytics, Evolution of HR Analytics, Analytical capabilities, Analytic value chain, Analytical Model, Aligning human resources to business through analytics, HR Analytics as a means of Strategic HR business partner, Importance and benefits of HR Analytics	T1: Chapter 2 & 3 & T2: Chapter 1	1 -2
2	People Analytics	Current approaches to measuring HR and reporting	T1: Chapter	3-5

	Frameworks	value from HR contributions, HR Maturity Framework: From level 1 to level 5, HR Analytics Frameworks: (a) LAMP framework; (b) HCM:21 Framework and (c) Talentship Framework, 5 overarching components of an effective Analytics framework. The Third Wave for HR value creation, Valuing HR Analytics in the organizational system	5 & T2: Chapter 1	
3	HR Metrics	Defining metrics, Human capital analytics continuum. Types of Measures – HR Productivity Metrics and Human Capital Metrics. HR Analytics, Strategic HR Metrics versus Benchmarking, HR Audit and Benchmarking using Analytics	T1: Chapter 4	6-7
4	People Analytics as a better tool for HR Decisions	Talent Metrics, Competency modeling using Data Analytics, Training & Development Metrics, HR Scorecards, HR Analytics as a better tool for HR Decisions, Performance related pay metrics, Talent retention and engagement metrics	T1: Chapter 4	8-9
5	HR Dashboards	Defining HR Dashboards, Creating HR Dashboards using statistical software used for HR analytics: <i>MS-Excel, IBM- SPSS</i> , and data visualization tools such as <i>MS-Excel, Power Bi, & Tableau</i>	T1: Chapter 4	10-12
6	HR Scorecards	Linking HR Data to operational performance, HR Data and stock performance. Creating HR Scorecard, develop an HR measurement system, guidelines for implementing a HR Scorecard. HR Scorecards & Workforce Scorecards and how they are different from HR Analytics	T1: Chapter 5	13-15
7	Statistics in HR	Descriptive and inferential statistics, HR research tools and techniques, Data analysis for human resources, HRIS for decision making	T1: Chapter 4	16-18
8	Insights into Data-driven HR	HR data and data quality: Typical data sources, Typical questions faced (survey), Typical data issues Validity, reliability, variation, HR Data collection, Steps for HR Data collection, Big Data for Human	T1: Chapter 4 & T2: Chapter 7	19-22

		Resources, Transforming HR Data into HR Information Process of data collection for HR Analytics, Data collection for effective HR measurement, Performance root cause analysis (RCA), RCA Flowchart		
9	Descriptive Analytics: Data Visualization & Reporting	Understanding basic features of Tableau Public, Understanding basic MS Excel Functions, Understanding of basic and advanced chart functions in IBM SPSS	T1: Chapter 6	23-25
10	Understanding Predictive Analytics	Steps involved in predictive analytics: Determine key performance indicator, analyze and report data, interpreting the results and predicting the future. HR predictive analytics in practice, Predictive modeling tools and techniques (Metrics and Regression analysis and Causation)	T1: Chapter 7 T2: Chapter 10	26- 30
11	Reporting & Data Visualization	Importance of Sources of data – Operational/ Social Media/ telephonic/ Reports, Getting the data together, Cleaning the data. Visualization – Summary Statistics & creating the report.	T1: Chapter 6 T2: Chapter 11	31-33
12	People Analytics and getting ready for the workplace of the future	Digital HR, Intelligent HR system, future of HR analytics in Indian context	T1: Chapter 8 & T2: Chapter 12	34
LS*: Lecture Sessions, ^ Remaining lecture sessions will be used for case analyses, live projects, hands-on practical and guest sessions (MS-Excel, IBM- SPSS, Power Bi and data visualization tools such as Tableau), simulation, and other presentations/ discussions				

Reading Assignments:

The following topics are to be read by student (as self-study) from the materials distributed.

Topic

An evidence-based review of HR Analytics
Competing on Talent Analytics
The Rise (and Fall) of HR Analytics A Study into the Future Applications, Value, Structure, and System Support
21st Century HR - The three big shifts needed for the future
How Microsoft Builds a Sense of Community among 144,000 Employees

Apart from the above list, students will be assigned with additional reading materials which they are required to read and come prepared to class. Course materials and information on selective in-class activities will be made available in the course file at the library and or in the course page at 'Nalanda'.

6. Evaluation Scheme:

Evaluation Component	Weightage (%)	Duration	Operational Details	Nature of Component	Date, Time and Venue
Midterm	30	90 min		Close book	To be announced [#]
Research-oriented project [#]	20	NA	Participation + Report	Take home	To be announced [#]
Self-study Assignment [#]	10	NA	To be announced in the class	Take home	To be announced [#]
Comprehensive examination	40	3 hours	• Theory application questions &	Closed book	To be announced [#]

Save Paper.
Save Trees.
Save the World.

innovate

achieve

lead

The details will be shared in the class at appropriate time.

7. In-Class case discussion:

- Dataset based activities
- Case study Apturja Power Limited: HR Analytics
<https://hbsp.harvard.edu/product/W21016-PDF-ENG>
- Case study HR Analytics at Barney
Case study on HR Metrics titled Verizon Communications, Inc.: Implementing a Human Resources Balanced Scorecard <https://store.hbr.org/product/verizon-communications-inc-implementing-a-human-resources-balanced-scorecard/101102>
- Measuring Results of HR Function: Case of the Société de transport de Montréal's Stang and Workforce Planning Division by Caee center
- Powertech India: Redesigning Workforce Composition By IVEY Publishing
- EdGE Networks: Making HR Intelligent
- Semicon India: Demystifying Work force Analytics
- Case study on HR Metrics titled '*Diversity Metrics at Google Inc*'

8. Consultation hours: Wednesday 3 pm

9. Notices: Notices, if any, will be shared in the course page at 'Nalanda' only.

10. Make-up policy:

- For make-up prior permission from the instructor in-charge should be taken
- Policies related to class attendance, unfair means and late submissions will be shared in the class and in the course page at 'Nalanda'

11. Note:

Classes will be delivered via online mode using Google Meet platform.

The pace of coverage will vary with *class interest*, the liveliness, new insights & quality of discussions or lack thereof. Hence, information on specific in-class activities to be assigned during the scheduled class is not specified in this handout.

(Instructor-in-Charge)
